VTES Tournament Archive – data from players, for players!

Did you know: VTES Tournament Archive (VTA) collects decklist data from tournaments around the world! This data will help VTES learn more of what strategies players believe in, how they perform, and more!

How can YOU help?

Before attending, ask your tournament organizer **in advance** if submitting decklists for the event is mandatory. If yes, you will have to submit the decklist to the organizer in order to participate.

• **Submit the decklist to the organizer!**

If the organizer does not require the decklist to participate, we would still love to have yours!

• **Submit the decklist directly to VTA!** (Preferably within 3 days of the tournament)

The email for voluntary submissions is:

VTESTournamentArchive@gmail.com

The email should contain:

• The **name** and **date of the tournament** as the title

• Your **VEKN ID** (https://www.vekn.net/player-registry)

• Your **decklist** as **simple text** or **VDB Snapshot-URL** (e.g. https://vdb.im/decks/97t654euui757ryf8)

Deckbuilding tools such as **VDB** (https://vdb.im/) or **Amaranth** (https://amaranth.vtes.co.nz/) make it easy to export your decklist; typing in your decklist takes no more than 15 to 20 minutes!

If you wish to type in your decklist by hand, use the following format:

1x [Card Name]

3x [Card Name]

We value your personal information! The VTA does not maintain their own player registry but relies on the one provided by VEKN. **The VTA tournament folder will include only VEKN IDs, your performance and standing in the tournament.**

If you wish to turn in your decklist anonymously, simply let us know in your email by adding a free-form statement, e.g. "I wish to submit the list anonymously". We will then omit your VEKN ID from that tournament's folder. Remember that you must add this statement separately for each tournament.

Submitting your deck helps in various ways, like keeping track of the performance of your favourite clan! This data may affect future cards and rule updates.

We are happy to help you if you have questions on player anonymity.
